Mechanical Specifications

Graceland Door Series

All Wood Construction: Our all-wood cabinets have construction features and product specifications designed to provide high quality and market acceptance.

Box construction:

All plywood (no particle board or other composite material)

Sides: ½-inch, 6-ply plywood

Cabinet bottom: ½-inch, 6-ply plywood

Backs -- ½-inch, 6-ply plywood full back

Shelving:

¾-inch lumber core shelves

Cabinets up to 36 inches have no center stiles

Drawer construction:

5/8-inch solid wood

3/8-inch wood drawer bottoms

Dovetail locking joints

Under-mount hardware with epoxy coated glides

Door construction:

Solid wood doors with no veneer used

Full-overlay doors and a typical 2mm reveal

Other Construction features

Lazy Susan has solid-wood rotating shelves and heavy duty five-knuckle European hinge on bi-fold door

Concealed hinges

Maple melamine interior finishes

Other Considerations

All cabinetry is shipped unassembled in containers from the factory. For large projects, cabinetry is easily and quickly assembled on the job site by installation teams reducing handling and potential damage to the product.

Cabinetry is secured by cam locks, and all backs and sides can be additionally fastened with hot glue and/or staples/nails, providing the same rigidity as would be realized in a custom shop or factory.
